**Statistical  
data:  
413 pupils in  
our school  
2022**

## What are the current challenges?

**Different levels of language proficiency,** attendance and motivation. Many migrants arrive for a short time, are not determined to learn a language or learn passively because they are not sure about long-term residence in the country.

**The adaptation problems** arise due to unusual working methods during lessons. Teachers' competence in foreign languages is poor.

**Lithuanian language teachers are lack of practice** exercises and diagnostic tasks that would alleviate the definition of the language skills of pupils. There is a shortage of teaching mater.

## What are the current challenges?

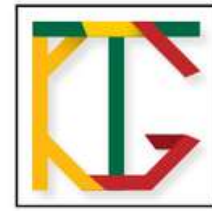

**Insufficient and inconsistent training of teachers** to deal with pupil's diversity. There is a lack of consistency and regularity.

**Additional support such as adaptation or the national language learning is not covered.** From 2018 September 1st there is a **class's basket**, but not a pupil's basket.

**Children's parents want their children to integrate** into the society more successfully; This prompts search for a new possibilities and creation of a new work style.
